

Blancco Stealth Cleaner

Blancco - Stealth Cleaner (BSC) is designed to erase the hard disk automatically if a computer ends up in the wrong hands. BSC acts like a 'time bomb'. It can be programmed to be activated on a particular date or after a certain number of boot ups. BSC is well hidden in the Operating System therefore it is difficult to detect it.

“Your Computer will self-destruct in 5 seconds...”

On the programmed date or after a given number of boot ups the erasure starts automatically in the background without the user's knowledge.

Key Features

- Easy and fast installation – security in 30 seconds!
- Contains preinstalled software with activation module
- User can determine when the erasure will be executed
- Selectable primary erasure targets
- Password protection to prevent unwanted activation
- Hidden in Operating System
- Uninstallation and deactivation functionality

Ideal solution for:

- Safeguarding data during logistics
- Protecting sensitive data when the computer is stolen

System Requirements

- PC that meets the system requirements for Windows
- Windows 2000/Windows XP/Server 2003
- NTFS file system
- Internet connection during installation
