

Blancco WAN Server

Blancco - WAN Server is a solution for PC, laptop and server management "in house" within the Blancco facilities. The user manages all erasure tasks and has full control of the system. Only the erasure reports are sent to the Blancco server.

All-in-One Solution

Blancco - WAN Server solution combines data erasure and performed hardware asset inventory within centralised database. All gathered information is available for browsing and printing over the Internet through secure connection. With Blancco - WAN Server, you are able to manage your erasure process and reporting more effectively.

Key Features

- Centralized hardware report management
- CSV, XML conversion from DB
- Accessible via browser
- Reporting over the Internet
- Ability to manage user rights
- Erasure reports can be easily customised
- Ability to customize user interface
- Reports can be viewed and sent via secure network

Value-added benefits

- No need for own servers or databases
- No need for installations
- Three levels of user accounts (Enterprise, Group, User)
- Easy to log in to the system
- User friendly

System Requirements (client erasure software)

- IBM compatible PC with 486DX processor or better
- IDE hard disk
- More than 16 MB of RAM memory
- 1.44MB floppy drive or CD drive
- SVGA display for graphical user interface; otherwise text mode
- Keyboard or mouse
